★★★★★

Best earplugs I've ever worn at a rock show

Saw Metallica live last month and was seriously worried about my ears, those shows are LOUD. Friend told me to try Hears before and honestly it saved the experience. Woke up the next morning completely fine. If your going to any loud shows do yourself a favour and get these first.

Best of the best!

A promise delivered!! After several disappointing purchases of specialty earplugs, I finally found Hears. I now use them in several different settings and they never let me down! Finally a product the delivers on the promise!

★★★★★

Bought for my teenager and now the whole family has them

Got these for my daughter who goes to alot of concerts and festivals. Was worried about her hearing long term. She loved them so much that my son wanted a pair, then my husband, then me. Quality is brilliant and they last. Great product.

★★★★★

Life changing!!

Tried so many different options and always compromised, either the sound suffered to much on stage or the protection wasn't enough. With Hears I can actually hear my bandmates clearly, hear my own instrument properly and still protect what hearing I have left.

Dalen F.

★★★★★

As a musician these are non negotiable Play in a band and my hearing has taken a beating over the years. Tried so many different options and always compromised, either the sound suffered to much on stage or the protection wasn't enough. With Hears I can actually hear my bandmates clearly, hear my own instrument properly and still protect what hearing I have left. Every musician/artist needs these, no excuses.
